Table Of Contents

1. Verify login function

wykop-3: Registration user

wykop-4: Registration user (wrong password)

wykop-5: Registration user (existing data)

wykop-6: Login by user name

wykop-7: Login by email

wykop-8: Login without account

wykop-9: Login with wrong user name

wykop-10: Login with wrong password

wykop-11: Forgotten password

wykop-12: Login with wrong email

wykop-13: Registration with Facebook

wykop-14: Login by Facebook

wykop-15: Change password

wykop-16: Change password (invalid)

wykop-17: Change password (different password)

wykop-18: Change password (too small characters)

wykop-19: Login with new password

wykop-20: Login with the old password

wykop-21: Change email (wrong password)

wykop-22: Change email

wykop-23: Change email (different emails)

wykop-24: Login with new email

wykop-25: Login with old mail

wykop-26: Delete account

wykop-27: Delete account (wrong code picture)

wykop-28: Login when deleting the account by Facebook (29 days)

wykop-29: Login when deleting the account (29 days)

wykop-30: Login when deleted the account (31 days)

wykop-32: Login when deleting the account by Facebook (31 days)

wykop-33: Login when deleted the account (30 days)

wykop-35: Login when deleting the account by Facebook (30 days)

wykop-36: Registration user (no regulations)

2. Verify "znalezisko" function

wykop-37: Dig up "znalezisko"

wykop-38: Dig up "znalezisko" (picture)

wykop-39: List of dig up "znalezisko" by the user

wykop-40: Bury "znalezisko"

wykop-41: List of bury "znalezisko" by the user

wykop-42: Withdrawal dig up

wykop-43: Withdrawal bury

wykop-46: Add "znalezisko" (empty link)

wykop-47: Add "znalezisko" (picture from web)

wykop-48: Add "znalezisko" (own picture)

wykop-49: Add "znalezisko"

wykop-50: Add "znalezisko" (empty form field)

wykop-51: Add "znalezisko" long title (81) and description (301)

wykop-52: Add "znalezisko" short title (5) and description (9)

wykop-53: Add "znalezisko" a large number of tags (7)

wykop-54: Edit added "znalezisko" (title, description, tag)

wykop-55: Edit added "znalezisko" (empty field)

wykop-56: Edit added "znalezisko" (a lot of characters)

wykop-57: Edit added "znalezisko" (too few characters)

wykop-58: Edit added "znalezisko" (url)

wykop-59: Edit added "znalezisko" (empty url)

wykop-60: Edit added "znalezisko" (picture)

wykop-61: Edit added "znalezisko" (empty picture address)

wykop-62: Opening the website from added "znalezisko"

wykop-63: Opening the website from edited url "znalezisko"

wykop-65: Edit added "znalezisko" (above 15 minutes)

wykop-66: Dig up "znalezisko" (not log in)

wykop-67: Add "znalezisko" (not log in)

wykop-68: Dig up "znalezisko" (not log in) 2

Scope

Testing website www.wykop.pl for learning test case and tool as TestLink

1.Test Suite : Verify login function

Testing module login: rejestracja, logowanie, aktualizacja danych i usuwanie

Test Case wykop-3: Registration user [Version : 1]

Author: user
Summary:

New user registration

Preconditions:

1. User has a valid email
2. User name is free

#:	Step actions:	Expected Results:
1	In the 'user' field, enter the user name	field filled
2	In the 'password' field, enter the password	field filled
3	In the 'email' field, enter the user email	field filled
4	Accepting the website regulations	field is [x]
5	Click 'Registration'	Opening the page with 'Link sent to [registration e-mail] to activate the account'
6	Open the link	registered user, opening the home page
Execution type: Manual		
Estimated exec. duration (min):		
Importance: High		
Requirements: None		
Keywords: None		

Test Case wykop-4: Registration user (wrong password) [Version : 1]

Author: user
Summary:

Registration user with wrong password

Preconditions:

1. user name is free
2. email is active

#:	Step actions:	Expected Results:
1	In the 'user' field, enter the user name	field filled
2	In the 'password' field, enter the password with 5 characters	field filled, message 'minimum password length 6 characters'
3	In the 'email' field, enter the email	field filled
4	Accepting the website regulations	field is [x]
5	Click 'Registration'	Reopen the user registration page

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-5: Registration user (existing data) [Version : 1]

Author: user
Summary:

User registration with existing user name and email

Preconditions:

- 1. User email is not free
- 2. Email is used to registration

#:	Step actions:	Expected Results:
1	In the 'user' field, enter the user name	field filled
2	In the 'password' field, enter the password	field filled
3	In the 'email' field, enter the email, which used to registration	field filled
4	Accepting the website regulations	field is [x]
5	Click 'Registration;	Reopen the user registration page

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case

Author: user
Summary:

Logging in using the user name used for registration.

Preconditions:

- 1. user has a account

#:	Step actions:
1	In the 'user or email 'field, enter the user name

2 In the 'password' field, enter the password

3 Klik 'Log in"

Execution type:	Manual
Estimated exec. duration (min):	
Importance:	High
Requirements	None
Keywords:	None

Test Case wykop-7: Login by email [Version : 1]

Author: user
Summary:

Logging be email, used for registration

Preconditions:

1. user has account

#:	Step actions:	Expected Results:
1	In the 'user or email' field, enter the mail	field filled
2	In the 'password' field, enter the password	field filled
3	Clik 'Log in'	user is log, open the home page
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	High	
Requirements	None	
Keywords:	None	

Test Case wykop-8: Login without account [Version : 1]

Author: user

Summary:

Logging to site without account

Preconditions:

1. user has not account
2. password has min. 6 characters
3. email is correct pattern

#:	Step actions:	Expected Results:
1	In the 'user or email' field, enter random characters	field filled
2	In the 'password' field, enter random characters min. 6	field filled
3	Clik 'Log in'	reopen logging site, message 'invalid login or password'
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	High	
Requirements	None	
Keywords:	None	

Test Case wykop-9: Login with wrong user name [Version : 1]

Author: user

Summary:

Logging with wrong user name

Preconditions:

1. user name is wrong
2. existing user password

#:	Step actions:	Expected Results:
1	In the 'user or email' field, enter wrong user name	field filled
2	In the 'password' field, enter the password	field filled

3	Klik 'Log is'	reopening the login page, the message 'incorrect login or password'
---	---------------	---

Execution type:	Manual
Estimated exec. duration (min):	
Importance:	High
Requirements	None
Keywords:	None

Test Case wykop-10: Login with wrong password [Version : 1]

Author:	user
Summary:	

Logging with wrong password

Preconditions:

1. user has account
2. wrong password

#:	Step actions:	Expected Results:
1	In the 'use or email' field, enter the correct data	field filled
2	In the 'password' field, enter the wrong password	field filled
3	Klik 'Log in'	reopening the login page, the message 'incorrect login or password'

Execution type:	Manual
Estimated exec. duration (min):	
Importance:	High
Requirements	None
Keywords:	None

Test Case wykop-11: Forgotten password [Version : 1]

Author:	user
Summary:	

Procedure for created a new password

Preconditions:

1. użytkownik zarejestrowany
2. adres mail aktywny

#:	Step actions:	Expected Results:
1	Klik 'forgot your password?'	open page 'generate new password'
2	filled in the 'Your e-mail address' field with the e-mail address assigned to the user account	send a link
3	open link with in-box email	open page to create a new password
4	In the 'new password' field, enter the password	field filled
5	repeat new password	field filled
6	klik 'creat'	open logging page
7	In the 'user' and 'password field, enter the user name nad new password	field filled
8	Klik 'Log in'	user log, open home page

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements: None
Keywords: None

Test Case wykop-12: Login with wrong email [Version : 1]

Author: user
Summary:

Logging with wrong email

Preconditions:

1. wrong user email
2. existing user password

#:	Step actions:	Expected Results:
1	In the 'user or email' field, enter the wrong email	field filled
2	In the 'password' field, enter the password	field filled
3	click 'Log in'	reopening the login page, the message 'incorrect login or password'

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-13: Registration with Facebook [Version : 1]

Author: user
Summary:

Registration with Facebook account

Preconditions:

1. user has Facebook account

#:	Step actions:	Expected Results:
1	Klik "link facebook account"	open the facebook.com login page
2	In the 'email / phone number' field, enter the correct data	field filled
3	In the 'password' field, enter the facebook password	field filled
4	Klik 'Log in'	created a new wykop.pl account

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements: None
Keywords: None

Test Case wykop-14: Login by Facebook [Version : 1]

Author: user
Summary:

Logging by Facebook account

Preconditions:

1. user has facebook account
2. wykop.pl account link with facebook account

#:	Step actions:	Expected Results:
1	Click 'Log in with Facebook'	open log Facebook.com page
2	In the 'user / phone number' field, enter the correct FB data	field filled
3	In the 'password' field, enter the correct FB data	field filled
4	click 'Log in'	User is logging
Execution type:		Manual
Estimated exec. duration (min):		
Importance:		Medium
Requirements		None
Keywords:		None

Test Case wykop-15: Change password [Version : 1]

Author: user
Summary:

Changing the password to a different

Preconditions:

1. user has account
2. user is logged

#:	Step actions:	Expected Results:
1	Click 'settings'	open new page
2	click 'password'	open new page
3	In the 'old password' field, enter the present password	field filled
4	In the 'new password' field, enter the new password with correct pattern	field filled
5	In the 'repeat password' field, enter the same characters - 'new password'	field filled
6	click 'change password'	message password changed
Execution type:		Manual
Estimated exec. duration (min):		
Importance:		High
Requirements		None
Keywords:		None

Test Case wykop-16: Change password (invalid) [Version : 1]

Author: user
Summary:

Changing the password to a different using invalid present password

Preconditions:

1. user has account
2. user is log in

#:	Step actions:	Expected Results:
		open new page
1	click 'settings'	
		open new page
2	clik 'password'	
3	In the 'old password' field, enter the random characters	field filled
4	In the 'new password' field, enter the new password	field filled
5	In the 'repeat password' field, enter the same characters - 'new password	field filled
6	clik 'change password'	password not changed, message 'the password is incorrect'

Execution type: Manual
 Estimated exec. duration (min):
 Importance: High
 Requirements: None
 Keywords: None

Test Case wykop-17: Change password (different password) [Version : 1]

Author: user
 Summary:

Changing the password to a different using two different password

Preconditions:

1. user has account
2. user is log in

#:	Step actions:	Expected Results:
1	clik 'setting'	open new page
		open new page
2	click 'password'	
3	In the 'old password' field, enter the present password	field filled
4	In the 'new password' field, enter the new password	field filled
5	In the 'repeat password' field, enter the different characters than 'new password'	field filled
6	clik 'change'	password do not change, message 'the passwords is different'

Execution type: Manual
 Estimated exec. duration (min):

Importance: High
Requirements: None
Keywords: None

Test Case wykop-18: Change password (too small characters) [Version : 1]

Author: user
Summary:

Changing the password to a different, using 5 characters

Preconditions:

1. user has account
2. user log in

#:	Step actions:	Expected Results:
1	click 'settings'	open new page
2	klik 'password'	open new page
3	wypełnić pole "stare hasło" poprawnymi danymi In the 'old password' field, enter the present password	field filled
4	In the 'new password' field, enter the 5 random characters	field filled
5	In the 'repeat password' field, enter the same characters - 'new password'	field filled
6	klik 'change'	password not changed, message 'password minmum 6 characters'

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-19: Login with new password [Version : 1]

Author: user
Summary:

Logging in to the website with new password, changed password.

Preconditions:

1. user has account
2. user changes password

#:	Step actions:	Expected Results:
1	In the 'user name or email' field, enter the correct data	field filled
2	In the 'password' field, enter the new changed password	field filled
3	klik 'log in'	user logged in, open the home page

Execution type: Manual
Estimated exec. duration (min):
Importance: High

Requirements: None
Keywords: None

Test Case wykop-20: Login with the old password [Version : 1]

Author: user
Summary:

Logging in to the website using a old password

Preconditions:

1. user has account
2. user changes password

#:	Step actions:	Expected Results:
1	In the 'user name or email' field, enter the correct data	field filled
2	In the 'passwordr' field, enter the old password	field filled
3	clik 'Log in'	message 'incorrect login or password', no login

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-21: Change email (wrong password) [Version : 1]

Author: user
Summary:

Changing email with linked account the website, used wrong password

Preconditions:

1. user has account
2. user has a active new email

#:	Step actions:	Expected Results:
1	click 'Settings'	open new page
2	clik 'email'	open new page
3	In the 'new email' field, enter the new active email	field filled
4	In the 'repeat new email' field, enter the same characters - 'new email'	field filled
5	In the 'password account' field, enter the wron password	field filled
6	clik 'change'	message 'wrong password', email not change

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-22: Change email [Version : 1]

Author: user
Summary:

Changing email with linked account the website

Preconditions:

1. user has account
2. user has a active new email

#:	Step actions:	Expected Results:
1	click 'settings'	open new page
2	click 'email'	open new page
3	In the 'new email' field, enter the new active account	field filled
4	In the 'repeat new email' field, enter the same characters - 'new email'	field filled
5	in the 'password account' field, enter the present password	field filled
6	click 'change'	message about a sending active link to a new email
7	open a link from the in-box	redirection to the website wykop.pl, changed e-mail

Execution type: Manual

Estimated exec. duration (min):

Importance: High

Requirements: None

Keywords: None

Test Case wykop-23: Change email (different emails) [Version : 1]

Author: user

Summary:

Changing email with linked account the website use different email

Preconditions:

1. user has account
2. user has a new active email

#:	Step actions:	Expected Results:
1	click 'Settings'	open new page
2	click 'email'	open new page
3	in the 'new email' field, enter the new email	field filled
4	In the 'repeat new email' field, enter the random characters - 'new email'	field filled
5	in the 'password account' field, enter the present password	field filled
6	clik 'change'	message 'email is different', email not changed

Execution type: Manual

Estimated exec. duration (min):

Importance: High

Requirements: None

Keywords: None

Test Case wykop-24: Login with new email [Version : 1]

Author: user

Summary:

Logging in to the website using a new, changed email

Preconditions:

1. user has account
2. user changed email

#:	Step actions:	Expected Results:
1	in the 'user name or email' field, enter the new changed email	field filled
2	in the 'password' field, enter the password	field filled
3	click 'Log in'	user is log in, open homepage

Execution type: Manual

Estimated exec. duration (min):

Importance: High

Requirements: None

Keywords: None

Test Case wykop-25: Login with old mail [Version : 1]

Author: user

Summary:

Login to the website using old email

Preconditions:

1. user has account
2. user changes email

#:	Step actions:	Expected Results:
1	in 'user name or email' field, enter the old email	field filled
2	in the 'password' field, enter the password	field filled
3	click 'Log in'	message 'invalid user name or password', user not login

Execution type: Manual

Estimated exec. duration (min):

Importance: High

Requirements: None

Keywords: None

Test Case wykop-26: Delete account [Version : 1]

Author: user

Summary:

Delete account from the website wykop.pl

Preconditions:

1. use has account
2. user is login

#:	Step actions:	Expected Results:
1	click 'settings'	open new page
2	click "tego"	open new page
3	prescribe code with picture in 'code picture' field	field filled

4 click 'Delete account' starting the deleting a user account

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-27: Delete account (wrong code picture) [Version : 1]

Author: user
Summary:

Delete account from the website wykop.pl, use wrong picture code

Preconditions:

1. user has account
2. user log in

#:	Step actions:	Expected Results:
1	click 'settings'	open new page
2	click 'tego'	open new page
3	prescribe wrong code with picture in 'code picture' field	field filled
4	click 'Delete account'	message 'invalid picture code', not delete account

Execution type: Manual
Estimated exec. duration (min):
Importance: High
Requirements: None
Keywords: None

Test Case wykop-28: Login when deleting the account by Facebook (29 days) [Version : 1]

Author: user
Summary:

Logging in to the website wykop.pl via FB, 29 days after starting the account deletion procedure

Preconditions:

1. user has account
2. user has an account linked with FB
3. user started deletion account
4. user log in 29 day after started delete account

#:	Step actions:	Expected Results:
1	click 'log in with facebook'	open facebook.com website
2	in the 'email or phone number' field, enter the correct FB data	field filled
3	in the 'password' field, enter the FB password	field filled
4	click 'Log in'	logging in to wykop.pl, opening the home page, the account deletion procedure aborted

Execution type: Manual

Estimated exec. duration
(min):
Importance: High
Requirements None
Keywords: None

Test Case wykop-29: Login when deleting the account (29 days) [Version : 1]

Author: user
Summary:

Logging in to the website wykop.pl, 29 days after starting the account deletion procedure

Preconditions:

1. user has account
2. user started deletion account
3. user log in 29 day after started delete account

#:	Step actions:	Expected Results:
1	in the 'user name or email' field, enter the correct data	field filled
2	in the 'password' field, enter the password	field filled
3	click 'Log in'	logging in to wykop.pl, opening the home page, the account deletion procedure aborted

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements None
Keywords: None

Test Case wykop-30: Login when deleted the account (31 days) [Version : 1]

Author: user
Summary:

Logging in to the website wykop.pl after finishing delete account, on the 31st day.

Preconditions:

1. user has account
2. user started deletion account
3. user log in 31 day after started delete account

#:	Step actions:	Expected Results:
1	in the 'user name or email' field, enter the correct wykop data	field filled
2	in the 'password' field, enter the password	field filled
3	click 'Log in'	message 'invalid user name or password', not login

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements None
Keywords: None

Test Case wykop-32: Login when deleting the account by Facebook (31 days) [Version : 1]

Author: user
Summary:

Logging in to the website wykop.pl via Facebook after finishing delete account, on the 31st day.

Preconditions:

1. user has account
2. user has an account linked with FB
3. user started deletion account
4. user log in 31 day after started delete account

#:	Step actions:	Expected Results:
1	click 'log in with facebook'	open facebook.com website
2	in the 'email or phone number' field, enter the correct facebook data	field filled
3	in the 'password' field, enter the facebook password	field filled
4	click 'Log in'	user not login
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	High	
Requirements	None	
Keywords:	None	

Test Case wykop-33: Login when deleted the account (30 days) [Version : 1]

Author: user

Summary:

Logging in to the website wykop.pl , 30 days after starting the account deletion procedure

Preconditions:

1. user has account
2. user started deletion account
3. user log in 30 day after started delete account

#:	Step actions:	Expected Results:
1	in the 'user name or email' field, enter the correct wykop data	field filled
2	in the 'password' field, enter the correct password	field filled
3	click 'Log in'	logging in to wykop.pl, opening the home page, the account deletion procedure aborted
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case wykop-35: Login when deleting the account by Facebook (30 days) [Version : 1]

Author: user

Summary:

Logging in to the website wykop.pl via FB, 30 days after starting the account deletion procedure

Preconditions:

1. user has account
2. user has an account linked with FB
3. user started deletion account
4. user log in 30 day after started delete account

#:	Step actions:	Expected Results:
1	click 'log in with facebook'	open facebook.com website

3	in the 'email' field, enter the active email	field filled
4	skip the regulations	field is []
5	Click 'Registration'	message 'Please check this box to continue'

Execution type: Manual
 Estimated exec. duration (min):
 Importance: High
 Requirements: None
 Keywords: None

2.Test Suite : Verify "znalezisko" function

Testing function "znalezisko" in the website wykop.pl

Test Case wykop-37: Dig up "znalezisko" [Version : 1]

Author: user
Summary:

Dig "znalezisko" by the logged user

Preconditions:

1. Logged user
2. "znalezisko" exists

#:	Step actions:	Expected Results:
1	click "dig up"	the button changes the name to 'withdrawal', "znalezisko" dug up, number of votes increased

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements: None
Keywords: None

Test Case wykop-38: Dig up "znalezisko" (picture) [Version : 1]

Author: user
Summary:

Test of digging a "znalezisko" by the user with a picture

Preconditions:

1. Logged user
2. "znalezisko" exists

#:	Step actions:	Expected Results:
1	click the picture	the button changes the name to 'withdrawal', "znalezisko" dug up, number of votes increased

Execution type: Manual
Estimated exec. duration (min):
Importance: Medium
Requirements: None
Keywords: None

Test Case wykop-39: List of dig up "znalezisko" by the user [Version : 1]

Author: user
Summary:

Verify list of all dig up "znalezisko" by the user

Preconditions:
